10	10	10	10	Brief and perfect presentation. Creative use of graphics and "rainbow" mode
8	9	8	10	Nice graphics and sound synthesizer solutions.

7	8	10	10	
7	8	9	8	very technically advanced
8	5	6	10	Where is the rest of the group? Has only one person done the project? A architectural view would have been nice. I understand that the system is complex by the way I hear it, but I cant picture it without better overview pictures.
8	6	6	9	A bit more hardware and less software would be appreciated. Great looking demo.
8	6	6	10	Good job. Maybe show a slide of the architecture. Show how the sound controller works. What were your problems?
10	10	10	10	Where can I get one?
10	10	10	10	Very scalable project!

7	10	8	9	Accurate description of hardware architecture. Excellent graphics.
9	10	7	9	Talk to the audience. Small text in pictures. Nice VGA controller, much work.

10	10	10	10	hehe…
7	7	8	8	Interrupting other speeches is unsmooth, prepare what is going to be said instead. The architecture was shown but not really explained.
6	7	7	9	Good informative slides. Great looking demo.
6	7	4	7	Interrupting each other is a bit unorthodox. The presentation seemed a bit stiff, there was no flow.
8	9	7	9	Not very fun to play.
7	8	6	8	Seems to work ok, whats the point of the keyboard? No Hw issues though.
7	7	8	7	Snygg grafik. Fungerade bra.

8	8	7	7	
6	7	8	8	a bit too fast (presentation)
10	10	10	10	Best presentation EVER!
10	10	10	10	Great demo.
10	10	10	2	Best presentation EVER!
5	7	8	9	Name ? -> HashCracker
4	7	5	5	It works but its kinda slow and the interface is not great.
5	8	7	7	Synd att prestandan inte motsvarande den förväntade (simulerade), annars bra design
