Group H

Alexander, Helene, Johan, Jessica, Petter and Sofia

Usual day in a students life..

Lab tomorrow - preparations
still to be done.

Get to a computer and get started!

But first I have to check..

50 minutes later...

Project misson: Deprocrastinator

- Voluntarily tool to help students decrease procrastination
- Based on black- or greylisting webpages that are unproductive
- Monitor time spent watching movies, playing videogames or other similar activities

Specification

- Context diagram
- Task descriptions
- Scenarios
- Feature requirements

Elicitation

- Stakeholder analysis
- Questionnaires
- Interviews
- Similar companies
- Brainstorming

Prioritization

- Pairwise prioritization was done using Focalpoint
- Focalpoint gives you a sense of how the requirements should be weighted against each other, but doesn't show any dependencies

Validation

- Internal review with checklist
- CRUDO-matrix
- Input from group C

Experiences

- Writing requirements specification
- Evaluating others results
- Working in group
