

Ultimate Survival Guide

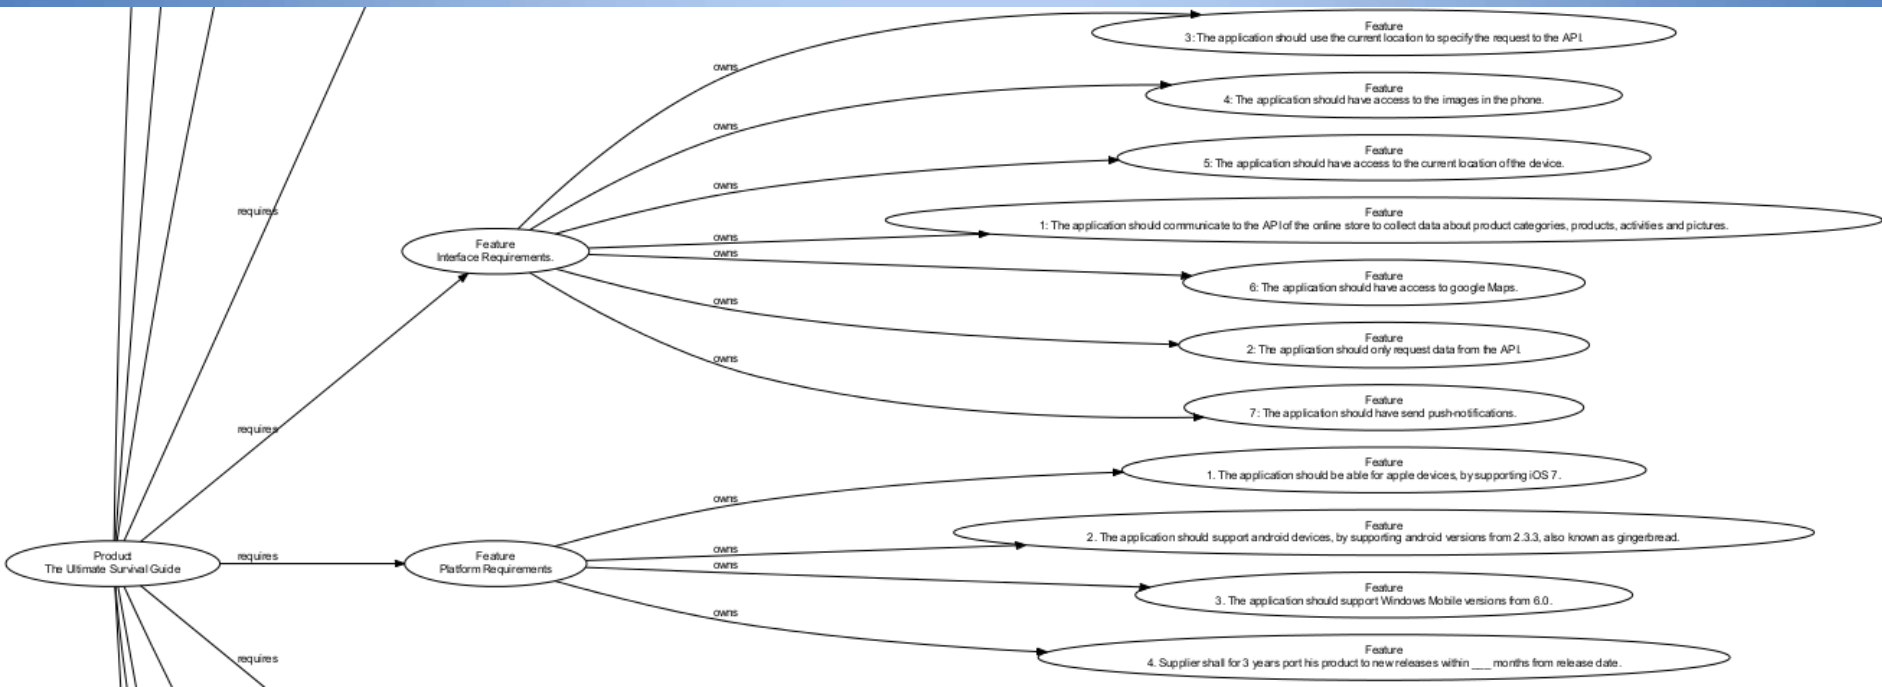

Presentation

- Our project
- Used techniques
- Lessons learned

Project Mission

- Applications, combination of sale and wildlife survival
- Geographical information offline
- Maps, accidents, berries etc

Elicitation

- Interviews
- Prototype
- Compare competitor
- Brainstorming

Prioritisation

- 100\$
- Dependencies
- Which lead to a release plan

Specified Requirements

- Functional
- Domain
- Quality
- System
- Goal
- Data

Validation

- CRUD- matrix
- Validation checklist

Lessons Learned

- More communication
- Prioritise what requirements to cover
- Importance of different techniques, they yield different result
- Prototype is a good starting point to work form
- The importance of proper requirements
