What we have done

Research question

Three phases

Phase 1: Collect data

Phase 2: Pinpoint

Our model

- Altitude curves
- Stacking layers of bounding boxes
- Create a matrix of the world
- Longitude & latitude

Language

User time zone

User location

Phase 3: Visualize

Google Maps

Demo

Results

- Confidence level
- What can we say about Trump?

Discussion

- Why not stack more layers?
- Trust the user
- What did we actually do?
- Improvements
- Future ideas
