

Exercise: Control structures

Write a procedure `evenCountdown(n: Int)` that prints all even numbers from `n` to 0.

Use:

- a) a while loop
- b) a for loop with a guard
- c) a for loop with yield
- d) a recursive function

Example output:

```
scala> evenCountdown(13)
12
10
8
6
4
2
0
```
